WE WORK THE WAY YOU WORK
YOU WORK THE WAY YOU WANT
The establishment of SHAFA in 1982 stems from a very modest beginning as a subcontractor with less than 20 employees, some of which still with us today. Our goal to success has always been to maximize the value of our services and deliver to the best of our clients' satisfaction that would see them come to us for more.

Today with over three decades of experience and in-house expertise developed from a wide range of highly diverse and global projects, SHAFA has demonstrated its capability to undertake and deliver complex projects within time and budget to a portfolio of international clients. We have proven to become an invaluable partner to deliver successful projects that often sees us working with the same partners on several other projects after.

Operating in an industry as diverse, competitive and ever evolving as that of construction, we are cognizant of its demands for continuous improvements. Not only does this apply to our responsiveness to client’s needs, excellence in technique, safety and quality but also extends to the development of our people who are the key to our success. With moral responsibilities rooted from a corporate culture, we ensure our business is conducted in a fair and ethical manner.

We endeavor to be one of the most competitive construction companies in the region with emphasis on efficiency in operations and reliability for clients.

Abdoshamakh Nasser Alshebani
Founder & Chairman of Shafa Group

CHAIRMAN’S STATEMENT

ABOUT US

Established in 1982 under the leadership of its founder and current chairman Mr. Abdoshamakh Nasser Alshebani, SHAFA has gradually expanded from a small subcontractor with less than 20 employees to become one major international player in contracting services and engineering with over 1,000 employees. With the skills and expertise gained over the 35 years since its establishment, SHAFA can provide its clients with the best and most competitive services. It has focused on its key competencies which lie in the disciplines of Supply of Ready Mix Concrete and Design & Build Civil and Marine Construction. However, has diversified to provide in-house HVAC and electro-mechanical services, agricultural development and Integrated Logistics services.

With its head office located in Dubai - UAE, SHAFA currently operates in seven different countries across three different continents. The portfolio of the executed projects executed by SHAFA and its international clientele demonstrates its capabilities to emerge as one of the market leaders possessing strong capabilities on delivering projects in time and budget.
OUR VALUES

SAFETY
We spare no effort on keeping people safe and provide a healthy and safe working environment for all.

ETHICS
SHAFA’s prime motivation is to gain and retain the confidence of its clients and business partners and hence we are uncompromising on our honesty, integrity and fairness.

QUALITY
We are cautious on workmanship and the quality of delivered works to our clients. We strive for excellence and doing the work right the first time. We believe in no short cuts and no repetitive works.

STAFF
We are a team that motivates each other with trust and delegation of important work. We promote and motivate a healthy work environment with each other through exchange of experiences and ideas that overcome challenges.

CULTURE
“We enjoy what we do and promote diversity. We work as one team and one family of different cultures and nationalities.”

RELATIONS
We build long-term relations with our clients, JV partners, suppliers and subcontractors based on trust and respect for each other. We are transparent with our works and committed to our word.

SAFETY

SHAFI knows that a successful operation is a safe operation. Within the group we have enforced strict, uncompromising safety rules and procedures, in line with the most stringent international standards. All employees are educated to apply those rules as well as those established by our clients.

Our policy and procedures have been developed to provide the necessary guidelines to minimize any potential risk to our employees and clients personal, as well as the environment.

VISION & MISSION

Our VISION is to become the leading design, build cost effective turnkey construction company serving Middle East & Africa region.

Our MISSION is to do the job right the first time, portraying a proper and correct image and striving continuously for improvement in everything we do.
Our Key Personalities

MR. MOHAMMED NASSER
General Manager

Started his career with SHAFA since 2014, with a creative mindset.

Mr. Mohammed defines the company’s long-term strategic goals and executes the plans to achieve those goals. He is responsible for its overall performance, ensuring that the company’s objectives are met. He oversees all aspects of the company, from contract bidding to project completion, ensuring that projects are completed on time and within budget.

MR. SAJID DEVASIA
Group Finance Manager

Joined SHAFA in 2010 and holds a degree in BCOM.

Mr. Saji is managing the overall financial leadership, including the oversight of group financial strategy, financial reporting and the corporate finance. He also investigates ways to improve profitability, and analyzes markets for business opportunities such as expansion, mergers or acquisitions. He is ensuring that all targets and objectives set by management are met.

MR. VIJAY SHINDE
RMC – Plant Manager

Joined SHAFA in 2007 and holds a Bachelor degree in Science.

Mr. Shinde is actively involved in the management of SHAFA’s ready mix plants and responsible for the day-to-day operational management, ensuring that the company’s strategic goals are met. He is responsible for the operation of ready mix business, sales, operational management and the installation and maintenance of plants and machinery. He oversees the delivery of ready mix services and ensures the company’s target for profitability is met. He is providing leadership for the development of SHAFA’s operations and ensuring that the company’s regulations, quality standards, safety and environmental policies are followed.

Excellence is a result of Sincere Effort, Intelligent Direction, Skillful Execution & the Vision to See Obstacles as Opportunities.

Excellence is a result of Sincere Effort, Intelligent Direction, Skillful Execution & the Vision to See Obstacles as Opportunities.
Civil construction really forms the basis of SHAFA activities. For over 25 years we have accumulated expertise in civil construction projects around the world.

SHAFA delivers its services in a number of different ways, each dependent upon and tailored toward the needs of its clients. We can provide pre-construction advisory services to a client with extensive in-house resources or assume the total responsibility of the design, construction and maintenance for a project.

- Port Developments
- Marina Development
- Infrastructure, Roads and Drainages
- Ready-mix Concrete Supply
- Historical sites rehabilitation/renovation
- Civil Engineering Turnkey’s Projects

SHAFA has in-house skilled electromechanical engineers capable of designing and executing electrical and mechanical works in industrial and residential projects.
MARINE WORKS

SHAFA have developed expertise in contracting services in port development. Upland port development has become a key part of our services that we offer. We have worked as a main contractor on port development projects around the world for clients Hyundai, Dubai Ports World (DP world) and Abu Dhabi Port Company (ADPC). SHAFA has further specialized in the design and development of world class marines.

Our expertise include

- RMC Beams and container stacking yards (design and build)
- Pontoon design and casting (marina development)
- Revetments
- Marine Piling
- Paving block production & Installation
- Block Paving construction
- Key wall Casting
- Concrete – Ready mix supply – Floating Batch plants
- Container Terminal development
- Supply of Quay wall blocks
- Mooring Dolphin
- Underground fuel tank farm installation for ship berthing and refueling.

In 2003 SHAFA began its operations as a first class supplier of concrete and has embarked on several high capacity projects since then. We have set up on site concrete batching plants in many countries around the world, some in remote locations, and have developed a team of experts and contacts that can deliver concrete to client needs and specifications, in addition to in-house laboratories to ensure concrete is produced to the highest standards of quality.

The environment is paramount in any installation our companies are associated with and all efforts are taken to ensure that dust and noise emissions are controlled while water is recycled and any waste concrete is either re-used on site works or disposed of in accordance with good practices.
TUBERCULOSIS CONTROL MEDICAL CENTRE - YEMEN

Client: Kitano
Consultant: Kuma & Inter-Techno Consultants
Location: Aden, Yemen
Built Up Area: 3800 m²
Duration: 12 Months

T3 TERMINAL FACILITY JEBEL ALI PORT

Client: DP World
Consultant: Design Labs
Location: Jebel Ali - Dubai - UAE
Area: 30,000 m²
Duration: 6 Months
H.H. SHEIKH HAMDAN BIN MOHAMMED CRUISE TERMINAL

Client: DP World
Consultant: Design Labs + WS Atkins (Client representative)
Location: Port Rashid - Dubai, UAE
Built Up Area: 125,000m²
Duration: 24 Months

JEBEL ALI TERMINAL 4 CONNECTING BRIDGE

Client: Bam International LLC
Location: Terminal 4 – Jebel Ali Free Zone, Dubai
Max Prod. Per day: 1,600 m³
Quantity Supplied: 472,879 m³
Duration: 28 Months
KHALIFA PORT & INDUSTRIAL ZONE QUAY WALL BLOCK READY MIX CONCRETE SUPPLY

Client: Hyundai Engineering
Consultant: Bechtel / ADPC
Location: Abu Dhabi - UAE
Max Prod. Per day: 1850m³
Quantity Supplied: 562,150 m³
Duration: 24 Months

PILE CAP FOUNDATION OF DUBAI-

Client: Hyundai Engineering
Consultant: WPS
Location: Blue Water Island Dubai
Area: 975m²
Duration: 6 Months
MAPUTO INTERMODEL CONTAINER DEPOT
Client: DP WORLD - Maputo
Consultant: CSAR ARCHITECTS
Location: Maputo Mozambique
Built up Area: Container & Bulk Yard 46,000m², Warehouse 8000m²
Duration: 12 Months

CONSTRUCTION OF DAKAR PORT
Client: DP WORLD – Dakar Senegal
Consultant: Sogreah Consultants France
Location: Dakar Senegal
Area: Container Yard 160,000 m²
Duration: 30 Months
MUL TILEVEL CAR STORAGE FACILITY (G+5+R)

Client: DP World
Consultant: ITD Consultancy (Client representative)
Location: Jebel Ali Free Zone - Dubai
Area: 38,663.20m²
Total No. of Car Storage: 12,119 Cars
Duration: 24 Months

EXPANSION OF CONTAINER TERMINAL 2

Client: DP World
Designer: MAPES Engineering Co. Ltd
Built Up Area: 115,836m²

DESIGN AND BUILD

MARINA VIEW

Client: DP World
Consultant: Adams Engineering Consultants
Location: Port Rashid - Dubai
Area: 27,833.95 m²
Duration: 14 Months
Details: Yacht Club 2 Units, Food & Beverage Restaurants 6 Units, Retail & Business Care 7 Units.

QUAY WALL

2 BERTH 9 DECK EXTENSION
PORT RASHID

Client: DP World
Consultant: ITD Consultant
Location: Port Rashid - Dubai, UAE
Built-up Area: 1,100 m²
Duration: 7 months
Mina Rashid Marina
Design & Build
Client: DP World
Designer: MAPES Engineering Co. Ltd
Location: Port Rashid – Dubai, UAE
Built Up Area: 114,500 m²
Duration: 22 Months

Construction of Sea Port Supply of Heavy Equipment Trucks
Client: Hyundai Engineering & Construction Co.
Total No. of Heavy Equipment per hour:
- Articulated Dump Trucks
- Dump Trucks
- Loaders
- Grader and Dozer
Duration: 22 Months

Client: DP World
Designer: MAPES Engineering Co. Ltd
Location: Port Rashid – Dubai, UAE
Built Up Area: 114,500 m²
Duration: 22 Months
QUEEN ELIZABETH -2
REFURBISHMENT WORKS

Client: DP WORLD
Location: Port Rashid - Dubai, UAE
Area (m²): 32,000
Manpower: 110
Duration: 2 Years
EXPANSION OF CT2 REEFER HUB

Client: DP World UAE Region
Designer: DPW-PDD
Local Consultant: MS Adams Engineering Consultants
Location: Container Terminal 2 Jabel Ali
Area: 13,489.20 m²
Duration: 121 Days

BERBERA TERMINAL WORKS
SOMALILAND
(DESIGN & BUILD)

Client: DP World Somaliland
Designer: DPW-PDD
Local Consultant: MS Adams Engineering Consultants
Location: Port of Berbera Somaliland
Area: 400m quay wall and 25 hectares of yard
Duration: 22 Months
